(54) INK FOR INKJET AND IMAGE FORMING METHOD

(57)Abstract:
PROBLEM TO BE SOLVED: To provide an ink for inkjet which gives a printed image improved in gloss properties, resistance to image bleeding and resistance to image peeling in a high humidity environment, and an image forming method.
SOLUTION: The ink for inkjet comprises a colored fine particle comprising a resin A containing a coloring material or a colored fine particle obtained by further coating the surface of the resin A containing the coloring material with a resin B, an aqueous medium and water, and satisfies the relation: $0.50 \leq a/b \leq 0.95$, where a is a light absorption coefficient when diluted with a poor solvent of the coloring material and b is a light absorption coefficient when diluted with a good solvent of the coloring material.
